

Monex Mass Payments Solutions

Powering seamless global payouts through intelligent automation and integrated FX

Introducing Monex's new Mass Payments solution – part of Monex's digital suite, designed for businesses with high-volume, multi-currency payment needs. Automate payouts, streamline reconciliation, and reduce operational friction with secure, scalable technology that fits seamlessly into your workflow.

The Smarter Way to Pay at Scale

Monex's Mass Payments solution is purpose-built for businesses managing high volumes of international, multi-currency payments. Integrated within the Monex Pay platform, it enables secure, scalable, and automated payouts – supporting everything from payroll and royalties to affiliate commissions and vendor disbursements.

With FX trading, payment execution, and beneficiary creation embedded into one seamless process, our platform combines real-time FX execution, automated workflows, and intelligent routing to simplify your payment operations.

Bulk Upload & Trade Execution

- Upload payment files with up to 10,000 payments per run
- Same-day processing with automated FX trade execution
- Schedule future-dated payments across currencies

Workflow Control & Transparency

- Map user roles to your internal processes with multi-entity support
- Immediate tracking of trades and payments
- Sync payment data with your internal systems to access tracking

Global Reach with Real-Time FX

- Multi-currency support in a single file upload
- FX trades grouped by currency and value date for optimisation
- Access global payment rails in 200 countries
- Real-time indicative FX rates visible at each step

Built-In Security & Compliance

- KYC onboarding with document checks and risk scoring
- Business rule and file format validation with clear error handling
- Pre-validation engine automatically details to prevent failed payments

Why Choose Mass Payments?

Global Reach

Seamlessly pay recipients worldwide in multiple currencies, supported by global payment rails and local currency settlement.

Scalability

Whether you're sending 100 or 10,000 payments, the solution scales with your business needs and volumes.

Efficiency

Process thousands of payments in one action - reducing manual input, admin overhead and time spent on reconciliation.

Cost Reduction

Automation and error reduction significantly lower operational costs, while minimising costly payment failures and remediation.

Accuracy & Control

Built-in data validation, approval workflows, and beneficiary checks help ensure payments are correct and auditable.

Enhanced Security

Fraud detection, document checks, and secure channels protect your sensitive data throughout the payment journey.

Currency & Country Coverage

Monex's Mass Payments solution supports payments to **200 countries** in more than **100 currencies**, enabling fast, reliable global payouts from a single file upload. Whether you're paying staff, suppliers, or partners, our platform enables clients to execute large-scale transactions with assurance that funds will land on time and in the correct format, regardless of destination.

With built-in FX execution, access to global and local payment rails, and integration with a global holiday calendar, clients benefit from accurate, transparent, and seamless cross-border payments - without the complexity of managing multiple providers or processes.

Your Needs, Our Solution

What You Need

What Mass Payments Can Do

| | | |
|--------------------------------------|--------|---|
| Ability to handle large files | —————> | Upload up to 10,000 payments in one go |
| To be able to fix errors fast | —————> | Edit or reject payments individually |
| Control payment approvals | —————> | Approve or reject at the individual level |
| Execute trades seamlessly | —————> | FX trading built directly into the workflow |
| Create beneficiaries easily | —————> | Add new recipients without leaving the platform |

Solving Key Payment Challenges

Can't see where payments stand?

Get real-time status updates and clear summaries

Too many systems involved?

Manage trade, payments, and reconciliation all in one place

Still approving payments manually?

Set up smart workflows to cut delays and reduce risk

Worried about file or data security?

Use secure file transfer and account validation (CoP)

Losing time to manual processes?

Combine FX and payments in one simple step

Errors holding up payments?

Pre-validate data before processing to avoid rework

Struggling to pay globally?

Send to 200+ countries in 100+ currencies

Industries & Applications

Built for businesses that need fast, reliable, multi-currency payouts. Ideal for:

Accounts Payable

Automate and streamline vendor payments across multiple currencies and jurisdictions.

Global Payroll & Contractors

Schedule and execute accurate, on-time payments across global offices with confidence.

Royalties, Claims & Licensing

Manage mass disbursements to rights holders, claimants, or policy beneficiaries with full validation, audit control, and reporting.

Dividend Distribution

Execute time-sensitive payouts with multi-user approvals and built-in risk checks.
